**ABSTRACT:** [Purpose] To clarify the effectiveness of a video of a practical skills lecture, distributed on the internet for revision purposes, through analysis of its actual use. [Subjects and Methods] The subjects were 101, 2nd-year physical therapy students of the International University of Health and Welfare. Use of the video and students' results were investigated, and a survey of items related to the viewing circumstances of the video, its content, and content requests and opinions was conducted. [Results] The number of views and viewing time of the video increased just before the exam compared with just after release, and the students with poorer results showed a tendency to use the video more. The video was viewed by more than 60% of the students, and more than 70% of them viewed the video in the 3 days before their exam. [Conclusion] A video for revision of physical therapy practical skills was made available on the internet. Its convenience was rated highly, and many students used it before their practical skills exam. The results also suggest that the video was useful for individual revision by students with low levels of understanding.

**Key words:** video learning material, physical therapy, practical skills education

**要 旨 :** [目的] 実技講義を撮影した動画教材を復習のためにインターネット配信し、利用実態の分析から、その効果を明らかにすること。[対象と方法] 国際医療福祉大学保健医療学部理学療法学科2年生101名を対象とした。成績別の視聴状況分析調査と復習動画の視聴状況、内容、希望、意見に関するアンケートを実施した。[結果] 視聴時間および視聴数は、配信直後よりも試験直前に増加し、成績別では下位層が多く利用する傾向を示した。全対象者の60%が動画を視聴し、試験3日前からの視聴が70%以上を占めていた。利便性では全対象者の60%以上が利用しやすいとの意見であった。[結論] 理学療法実技分野へ復習のための動画を配信した。利便性が高く、実技試験のために多くの学生が使用していた。また、理解度の低い学生の個別学習にも有用であることが示唆された。
