

The Smartest Dinosaurs

Not all dinosaurs were equally dumb. Here's a list of the 10 smartest dinosaurs of the Mesozoic Era, ranging from Allosaurus to Troodon. The genus that perhaps fits this description best was the Cretaceous bird-like dinosaur Troodon, which also may have had binocular vision (depth perception). A: The smartest dinosaur, if you compare body size to brain size (a rough measurement of intelligence) is Troodon. Troodon was a meat-eater the size of a man. Troodon had a large brain for its relatively small size and was probably among the smartest dinosaurs. Its brain is proportionally larger than those found in living dinosaurs. Dinosaur intelligence has been a point of contention for paleontologists. Non-avian dinosaurs were once regarded as being unintelligent animals but have. Generally people think of dinosaurs as pea brains but that isn't always the case so I bring you 10 SMARTEST dinosaurs ever known. The genus that perhaps fits this description best was the Cretaceous bird-like dinosaur Troodon, which also may have had binocular vision. As others have already said, Parrots and Corvids are generally considered the smartest modern birds, and it's speculated that Troodon might have been the. Heavy debate surrounds the topic of dinosaur intelligence; as mentioned in my previous blog post, we will never know the true extent of the intelligence of any.
