**Abstract:** In the globalization era, ISO 14001 and Environmental performance (EP) are increasingly implemented in the automotive industry. The implementation of Environmental Management System (EMS) specified by this International Standard. It specifies the requirements for an EMS, which provides a framework for an organization to control and monitor their environmental impact of company activities, products and services for improving environmental performance continually. The purpose of this study is to proposed structural relationship ISO 14001 and environmental performance model for Malaysia automotive industries. The conceptual model using Structural Equation Modeling (SEM) has been proposed. Base on the proposed conceptual model and reviewed, research hypotheses are being develop, the paper culminates with suggested future research.

**Keywords:** ISO 14001, Environmental Management System, Environmental performance, Performance measurement, Structural Equation Modeling
